

F SERIES · DESKTOP UV PRINTER

YOWILL F2030 Desktop UV Flatbed Printer

A compact desktop UV flatbed printing solution for gift customization, copy shops and small-batch production. It prints directly on acrylic, glass, metal, wood, PVC and leather with CMYK + white ink output and instant LED UV curing.

20 × 30 cm Print Area

CMYK + White

0-8 cm Print Height

Instant LED UV Curing

Key Features

Compact Commercial Setup

Small footprint for retail stores, studios, e-commerce customization and startup production.

Direct-to-Material Printing

No plate making required. Print directly on rigid and semi-rigid material surfaces.

Color + White Output

CMYK + white ink supports transparent, dark and colored materials with better image coverage.

Instant Curing, Easy Operation

LED UV curing enables fast delivery. RIP and control software make daily operation easier.
